

**Technical Specifications** 

# High Repetition Rate 1535nm Erbium Glass Lasers

High repetition rate 1535nm Erbium glass lasers are RealLight's self- developed eye-safe lasers operating at 1-5kHz. Utilizing the semiconductor laser packaging technology, these lasers feature compact size, sufficient performance stability and excellent beam quality.

#### **Key Features**

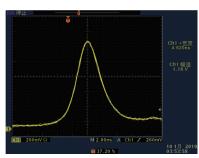

- Passively Q-Switched, Er:Glass
- Eye-safe
- Extremely light
- Wide operating temperature range

### Applications

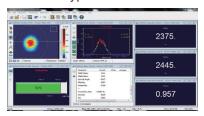

Obstacle avoidance radar Meteorological radar Laser rangefinder RealLight

| Wavelength ( nm )                 | 1535   |     |    |
|-----------------------------------|--------|-----|----|
| Pulse energy (μJ)                 | 50     | 20  | 10 |
| Repetition rate (kHz)             | 1      | 2.5 | 5  |
| Pulse width (typ., ns)            | 5      | 6   | 8  |
| Operating current (A)             | 5      |     |    |
| Operating voltage (V)             | 2      |     |    |
| Beam full divergence (typ., mrad) | 16     | 17  | 18 |
| Beam profile                      | TEM00  |     |    |
| Energy Stability (RMS)            | 3%     |     |    |
| Weight (g)                        | 10     |     |    |
| Dimensions (L×W×H,mm)             | 25x8x7 |     |    |
| Operation temperature (°C)        | -40~65 |     |    |
| Storage temperature (°C)          | -45~80 |     |    |

All the data in the above table are the typical values obtained from the tests at room temperature of 25 C, and the final data is subject to the final test report.
